- Robust, Heavy Duty Box Beam Construction
- Precision Single Point Load Cell
- Weighs in pounds or kilograms at touch of a button
- Weight Capture Mode
- Built-in leveling bubble
- Four (4) Adjustable leveling feet for uneven surfaces
- Easy-to-Read, Bright Red LED 6-Digit display
- Swivel tilt bracket for convenient viewing of readout
- Power: AC Adaptor (included) or six (6) AA Batteries
- Choice of Capacity: 0 to 750 lb (see chart) below

The DRS is a professional quality scale offering exceptional accuracy and durability at a reasonable investment. Resolution is more than twice as good as competing medical scales at 0.1 lb increments for a 500 lb capacity scale. This permits weighing bariatric patients as well as children or infants in a parent or nurse's arms on an adult scale. Heavy gauge stainless steel construction ensures an attractive appearance that will last for years. The welded box beam construction is built tough to withstand heavy use. A unique two-stage shock absorption design protects the WWS from damage when other scales would fail. Capacities up to 750 lb are available.
