

**SIMPLE, BIG,  
RUGGED.  
JUST WHAT  
YOU NEED.**

## **EZIWEIGH5** **WEIGH SCALE**

We developed the new **EziWeigh5** for those who want a no-nonsense, entry level weigh scale indicator that does the basics brilliantly.

The no-nonsense EziWeigh5 is ideal for weighing situations where you want to quickly and easily collect the weights of your animals and don't need to record additional data.

What's so great about the EziWeigh5?

It features the largest display screen on the market, so it's easy to read in all conditions. The high contrast display is clearly visible in the brightest daylight and the screen features an LED backlight for visibility in failing light or in dark sheds.

Being 100% water and dust proof, the EziWeigh5 is up to the task for rugged, all weather conditions.

Tru-Test's Superdamp™ III technology is at the heart of the EziWeigh5, enabling you to receive accurate live animal weights quicker than any other weigh scale on the market (even with the liveliest animals).

As well as this, the EziWeigh5 includes convenient stable lighting to clearly indicate when weights can be noted,

top quality load bar connectors, ensuring the quality and accuracy of your weigh system, and a fine weight mode for flexibility.

So there it is. The EziWeigh5 is simpler, easier to read, more accurate and robust than its predecessor - just what you need when collecting weights is your priority.

### **Key Features:**

- **Highly visible display.** The EziWeigh5 has a large 1.4" high display with a super bright white LED backlight to make it viewable in all conditions, from the brightest daylight conditions to darkness.
- **Durable case.** All Tru-Test products are designed for the tough agricultural environment. The EziWeigh5 takes this to a new level with double walled construction for extra protection.
- **Compatible.** The EziWeigh5 weigh scale indicator is compatible with all load sensors currently available in the Tru-Test range. No calibration is required as EziWeigh5 automatically recognizes the load sensing device connected.
- **Auto zero.** Ensures any accumulation of animal dirt on the platform or crate is zeroed out. User selectable

on/off. The auto zero key also controls the power up zero function.

- **Bright red stable light.** You can easily identify when you have a stable weight.
- **Fine mode.** On/off option allows weighing in a finer resolution for lower weights.

- **Auto power off.** The EziWeigh5 automatically turns off after 15 minutes of no activity to save the battery.
- **Fast charging.** 110 V charger can charge the battery in 3 hours.

Product Description	Part Number	Barcode
<b>EziWeigh5 weigh scale indicator</b> Includes: 110 V charger, mounting bracket.	817399	9414731408164

General Specifications	
Size	8" x 9.5" x 3" (W x H x D)
Weight	2.4 lb
Internal Battery	Charging time = 3 hours in normal conditions Run time = 20 hours (backlight off) Auto power down = 15 minutes
Power Requirements	Supplied power adaptor or USB 5 V d.c. (do not connect 12 V d.c.). Car charger available as accessory.
Ingress Protection	IP67, 100% water and dust proof
