

TRU-TEST®

The ID era has begun.

Introducing Tru-Test's new addition to the 3000 series of indicators ...

ID 3000

Your entry into
the age of EID

Electronic Identification (EID) of animals will soon be **mandatory** in this country, so let Tru-Test help you get ready. The **ID3000** indicator will ensure compliance with the new EID regulations and let you manage your stock more profitably. Tru-Test's **ID3000** will enable you to use the compliance requirements to your advantage, all at the tip of your finger. The **ID3000** will provide information on individual animals as well as the entire group. You will be able to determine the average daily weight gain of each animal, and also track how the entire herd is performing. This will help you adjust feed and animal health requirements appropriately. The new **ID3000** is an affordable entry into the world of EID assisted animal management.

ID3000 Benefits:

- Fully EID capable Just plug in your EID reader to unlock the added benefits of EID animal output. Visual tag and EID are fully cross referenced
- Download/Upload data quickly and easily via serial cable to your PC
- Stores up to 10,000 records of weighing information
- Flexible ID3000 can be used with all Tru-Test load bars and platforms
- Fully upgradable to XR3000 or new WOW! Walk-Over-Weighing technology
